ATTACHMENT TO ADVISORY ACTION

Applicants' amendment to the claims filed on 07/23/2009 has been fully considered but is denied entry for the following reasons:

The amendment raises new issues that would require further search given that such limitations were never previously presented in the claims.

Applicant argues that none of the cited prior art documents discloses that L-carnitine in pure crystalline form, having a degree of purity of 99% and not more than 1% of residual components or at least one mixture of substances containing L-carnitine which is present as $C_{13}H_{12}NO_{10}$ and/or $C_9H_{18}ClNO_4$ is added to a fruit gum composition.

Given modified Gordon et al. teach a sweetened gelled food comprising L-carnitine with the formula $C_7H_{15}NO_3$ in pure crystalline form, having a degree of purity of 99% and not more than 1% of residual components and L-carnitine -L-tartrate, it is clear that the limitations of claims 18 and 20 have been met.
